#### Background Information:

Each year, the Public Works Department replaces aging and failing plastic water service lines in Boulder City with new copper services. Plastic water service lines installed in the past have a short life span,

causing water to be wasted and damage to streets from leaks. Copper service lines have a long and reliable history of use for water service lines. There are 51 service replacements included in the Water Service Replacements – Georgia South project.

The Notice Inviting Bids for this project was posted to the Nevada Government eMarketplace (NGEM) on February 2, 2023. On February 16, 2023, 4 bids were received, opened, and tabulated. The Bid Summary showing the bidder's information and bid amounts has been included as an attachment to this staff report. Acme Underground Inc. was the lowest responsive and responsible bidder, with a bid of \$328,682.50. Once the Notice to Proceed is issued, this will be a 120-calendar day project.
